Night work on the Hills M2 Motorway, Baulkham Hills to Macquarie Park: Installation of intelligent transport communication systems

Dear resident,

NorthConnex is upgrading the intelligent transport communication systems on the Hills M2 Motorway. The new system will connect the Westlink M7 and Hills M2 motorway control centres to help monitor and improve traffic flows in the area when the NorthConnex tunnel is operational.

We will carry out night work to install fibre optic communications cabling at intervals along the 18 kilometre stretch of the Hills M2 Motorway between the Westlink M7 Motorway, Baulkham Hills and the Hills M2 motorway control centre, Macquarie Park. A map of the work area is included overleaf.

Work is scheduled to start on **Sunday 19 August 2018** and will take about four months to complete, weather permitting.

To ensure the safety of motorists and workers, this work will generally be carried out at night **between 7pm and 5am**.

Work activities will include delivery of cable drums and materials to site, lifting pit lids and pulling cables through by hand, splicing and joining of cables, testing and commissioning and pit repairs.

Lane closures and traffic control will be in place to ensure the safety of motorists, cyclists, residents and workers.

Please allow extra travel time and visit livetraffic.com, download Live Traffic App or call the Transport Management Centre 132 701 for the latest information.

If you have any questions or complaints, please contact us on 1800 997 057 (24 hours), enquiries@northconnex.com.au or visit the NorthConnex Community Information Centre at 118 Yarrara Road, Pennant Hills, open Monday to Wednesday, 9am to 1pm.
