

## COVID-19 COMMUNICATIONS

**Friday 27 March 2020**

The NorthConnex project takes the health and wellbeing of the community and its workers very seriously.

The project team has implemented a number of proactive measures to address the potential impact of COVID-19 while ensuring the continuation of its project delivery.

The measures are in-line with the latest advice issued by the Australian Government and NSW Health. Some of these measures include:

- Using email, mail, phone calls and video conferencing to communicate with residents and limiting door knocking where possible
- Maintaining a minimum 1.5 metre distance between workers and the community
- Not shaking hands
- Temporarily closing the Community Information Centre located at 118 Yarrara Road, Pennant Hills, 2120.

The NorthConnex project will continue to actively monitor and assess the situation to ensure appropriate measures are implemented to protect the community and keep its workers safe and well.

We will continue to update the community if the situation changes.
